

Finding Answers To Your Utility Financing Needs And Environmental Issues

Sponsored by Missouri Public Utility Alliance

- Is it getting harder to keep the cost of utility operations balanced with current rates?
- Does it seem like new EPA/DNR rules are taking more money out of your city treasury than you want?
- Are your utility cash reserves dropping?
- Can your water, wastewater, natural gas, and electric utility help promote economic development?
- How can you fund needed improvements when the voters don't seem to support rate or tax increases?

This is a unique opportunity for city leaders from central Missouri to share ideas, receive new insights and engage in frank discussions with the state's leading organization on municipal utilities. Sessions will focus on available strategies to deal with new federal and state environmental regulations.
